

Lotus 10 and Lotus 15 Cylindrical Electric Scrubber/Dryer

- Two Sizes - 10" and 15" to fit any application
- Thoroughly Deep-Cleans Porous And Textured Surfaces
- Compact Design Stores in a Very Small Footprint
- Restores as it cleans
- Scrubs and Dries in one Pass
- Cylindrical Design Out-Performs Traditional methods
- Safe and Easy to Use, Even in Restoration

Restores and Maintains Grouted and Textured Floors

The Lotus Series of Scrubber/dryers is specifically designed to give unequalled performance in maintaining and restoring grouted and textured floors. The Lotus scrubbers are the only full line of cylindrical scrubbers on the market and come in 10" and 15" models to fit into any facility's cleaning needs. The cylindrical brush design applies much more pressure to go deep into the textured surface than traditional disc brushes. The Lotus scrubbers dispense the fluid into the brush - continually cleaning the brush. The cleaning solution is scrubbed deep into the surface and a powerful vacuum removes the soiled solution and dries the surface as it cleans.

The unique design of the Lotus scrubbers makes them easy to use, transport and store. Just flip the switch and the Lotus scrubbers clean and dry in any direction. There are no adjustments needed - just clean. When through, lift the handle and the brush is pulled up off the floor into a storage position. All the Lotus scrubbers are designed with

dolly wheels for easy transport from room to room or building to building. Fold down the handle and the units will fit into the trunk of a car or stand upright to store in a very small foot print. Imagine, a 15" scrubber in the trunk of a car.

For specialized applications, the vacuum can be turned off for continual scrubbing and better utilization of the cleaning solution. The Lotus scrubbers by their design utilize less cleaning solution than traditional systems. In short, cylindrical scrubbing puts more force and more cleaning solution in a more concentrated area to get down deep into the surface where disc scrubbers just can not go. Thus, a cleaner surface. Use the Lotus scrubbers to maintain the surface and never have to restore the surface again. The surface will look better and will maintain its non-slip properties to reduce slips and falls.

There are several brush options to fit any of your maintenance and restoration needs.

Lotus 10 and Lotus 15

Cylindrical Electric Scrubber/Dryer

Lotus 10 - The Lotus 10 is designed with two cylindrical counter-rotating brushes to give a good performance in a very lightweight design. At 10 inches and only 33 lbs., the Lotus 10 can be easily brought up and down stairs and can maneuver in and out of the toughest spots. Even congested restrooms! The Lotus 10 is a limited moisture system. No need to go back and forth to dump and refill your mop bucket. The Lotus 10 will deep clean with only a fraction of the cleaning solution of traditional methods. The soiled fluid tank easily snaps out with just one hand and can be dumped into any sink.

Lotus 15 - The Lotus 15 is designed with one powerful cylindrical brush. This system will handle your toughest restoration needs. The brush is contained between a two-squeegee system to allow for cleaning in either direction. The Lotus 15 comes with one cleaning solution tank and one recovery tank. Both are removable for easy dumping and filling. The 15" design offers high production restoration and maintenance system for grouted and textured surfaces.

Lotus 10

Lotus 15

| Model: | Lotus 10 | Lotus 15 |
|-------------------------|-----------|-----------|
| Working Width: | 10 inches | 15 inches |
| Brush Motor: | 1 hp | 1/2 hp |
| Vacuum Motor: | Turbine | 1-1/2 hp |
| Pump Motor: | Gravity | 45 Watt |
| Solution Tank Capacity: | 1.32 gal. | 4 gal. |
| Recovery Tank Capacity: | 0.79 gal. | 4 gal. |
| Power Cord: | 33 ft. | 33 ft. |
| Weight: | 33 lbs. | 60 lbs. |
| System Amps: | 10 amps | 15 amps |
| RPM: | N/A | 800 |
